State of the Art.

by MK Illumination

Our premium and most exclusive collection of motifs is the Limited range, a unique collection of innovative three-dimensional motifs that are characterised not only by the high quality and precise workmanship that goes into every motif, but above all the creative and artistic impressions from which they are born. By working closely with our designers, our craftsmen are able to create beautiful results that are in line with the latest market trends and exceed our clients' requirements.

MK Illumination

Enlightening your vision.

Since 1996 MK Illumination has been setting the industry benchmark for the development of high performance festive and decorative lighting. Our roots lie in Innsbruck in the Tyrol region of Austria but over the years we have established a worldwide network of 26 independently managed subsidiaries. This structure enables our customers to benefit not only from direct customer contact and regional knowledge but also our international group experience.

By working closely with our customers in each region we have developed an extensive pool of experience and technical know-how which ensures our customers receive the best service possible and that our product range is always at the forefront of current market trends. We project manage every part of the process: from conceptual design, manufacture and installation; through to storage and maintenance.

Our dedicated team of highly skilled designers and craftsmen work with great care and attention to detail to create exclusive designs for the **Limited Series**.

Our motto "Everything Under One Roof" accurately describes the comprehensive service that we are able to provide each customer. By handling every step of the project our customers can gain comfort from the fact that every stage, from initial concept through to design, manufacturing and installation is handled by highly qualified individuals.

By working closely together our team is able to transform the most intricate designs into stunning results that exude the quality associated with MK's products.

The highest quality as standard.

At MK Illumination we never compromise on quality and safety. Whether you are considering our standard product range or a customised lighting solution you can be assured that all of our products have been developed using materials that comply with European safety standards (B1, M1) and routinely tested by our own laboratories and external inspection authorities.

In addition we guarantee that all of our products and materials have been successfully tested in accordance with strict international guidelines (Legal Compliance) and comply with European safety standards.

The source of MK's success: the Premium LED.

- PREMIUM LEDs have a longer lifespan and are more energy efficient: the Premium LED specifically developed to meet MK's quality standards has been proven to have a longer operating life (see image). Additionally, tests indicate that compared with conventional LEDs, the Premium LED shows minimal loss of luminance (lumen in percent).
- The Premium LED comes impressively close to generating the same warm white light as a conventional light bulb and can be used effortlessly to create a warm white Christmas atmosphere. Our brilliant white mood lighting is perfect for creating magical winter landscapes.
 - warm white 2200-2500 Kelvin
 - brilliant white 6500-8000 Kelvin
- We only use low power LEDs in our products. These deliver two distinct advantages: First of all, they allow our customers to achieve up to 80% energy savings, and secondly, the LEDs generate very little heat.

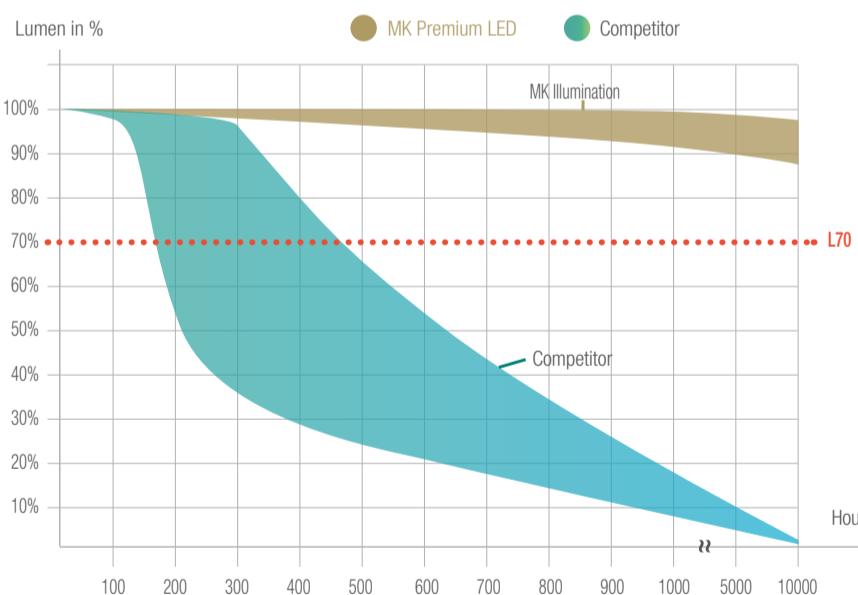

Christmas lighting: sustainable and economically attractive.

At MK Illumination we are deeply committed to providing lighting solutions that are not only attractive and built to the highest quality, but are also economically attractive and make a valuable contribution to the protection and conservation of the environment, the climate and natural resources.

Sustainability has become more than simply a passing trend – it is now an essential ingredient to doing business responsibly and successfully.

Longer operating life and eco-friendly

At the heart of the debate surrounding product price and quality versus sustainability is product life cycle. MK Illumination has conducted comprehensive research into its products to identify if and how they maintain their luminosity during their product lifetime when compared to those of its competitors. Initial internal tests have provided clear evidence that the quality of the patented LEDs used by MK have a very distinctive advantage when it comes to 'loss of lumen'. For clarification: Lumen is the measure of the total "amount" of visible light emitted by a source.

Source: Results from internal and external tests.

To find out more about this subject, please contact: info@mk-illumination.com

Handcrafted precision.

We manufacture our innovative designs at our state-of-the-art facility in Prešov, Slovakia, where over 20,000 motifs are handcrafted each year.

Our highly skilled team at this facility ensure that every product is manufactured to the highest possible standards and comply with European safety standards to guarantee quality, performance and reliability.

We continually invest in our employees and are committed to their ongoing training to enhance their professional knowledge and experience. Our staff are critical to our overall success and through their continued development we can ensure our production methods remain efficient and we deliver the best possible end products to our clients. As a result of our investment in our staff our employees at our facility in Presov were recently awarded the "Opalkorn", a regional award for employee satisfaction.

Minimum LED: Power supplies 7, 15, 30, 60, 200, 400 and 800 W need for their correct operation a minimum LED load as listed. A lower load might result in a flickering light chain.

LED Mindestbelastung: Die Netzteile 7, 15, 30, 60, 200, 400 und 800 W benötigen für den korrekten Betrieb eine Mindestbelastung wie angegeben. Wird diese Mindestbelastung unterschritten, kann die angeschlossene Lichterkette flackern.

* Please order the country specific Main Connector!
Bitte den länderspezifischen Anschluss bestellen!

Accessories Low Voltage

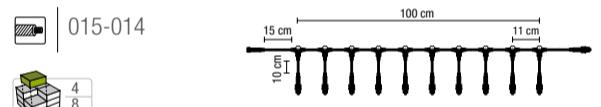

QuickFix® Divider 2

T-Divider, Divider cable with 2 outlets
max. load capacity: 200 W (92C)
T-Verbinde, Verteilerkabel mit 2 Ausgängen
max. Belastbarkeit: 200 W (92C)

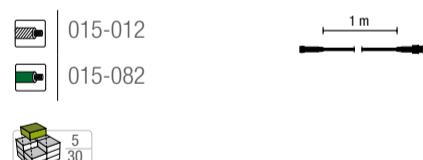

QuickFix® Divider 11

Divider cable with 11 outlets
max. load capacity: 200 W (92C)
Verteilerkabel mit 11 Ausgängen
max. Belastbarkeit: 200 W (92C)

QuickFix® Extension 1

max. load capacity: 200 W (92C)
max. Belastbarkeit: 200 W (92C)

QuickFix® Divider 3

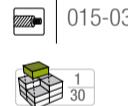

Divider cable with 2 outlets
max. load capacity: 200 W (92C)
Verteilerkabel mit 3 Ausgängen
max. Belastbarkeit: 200 W (92C)

QuickFix® Accessories

3 end caps
3 seal rings
3 shrink tubes
3 Endkappen
3 O-Ringe
3 Schrumpfschläuche

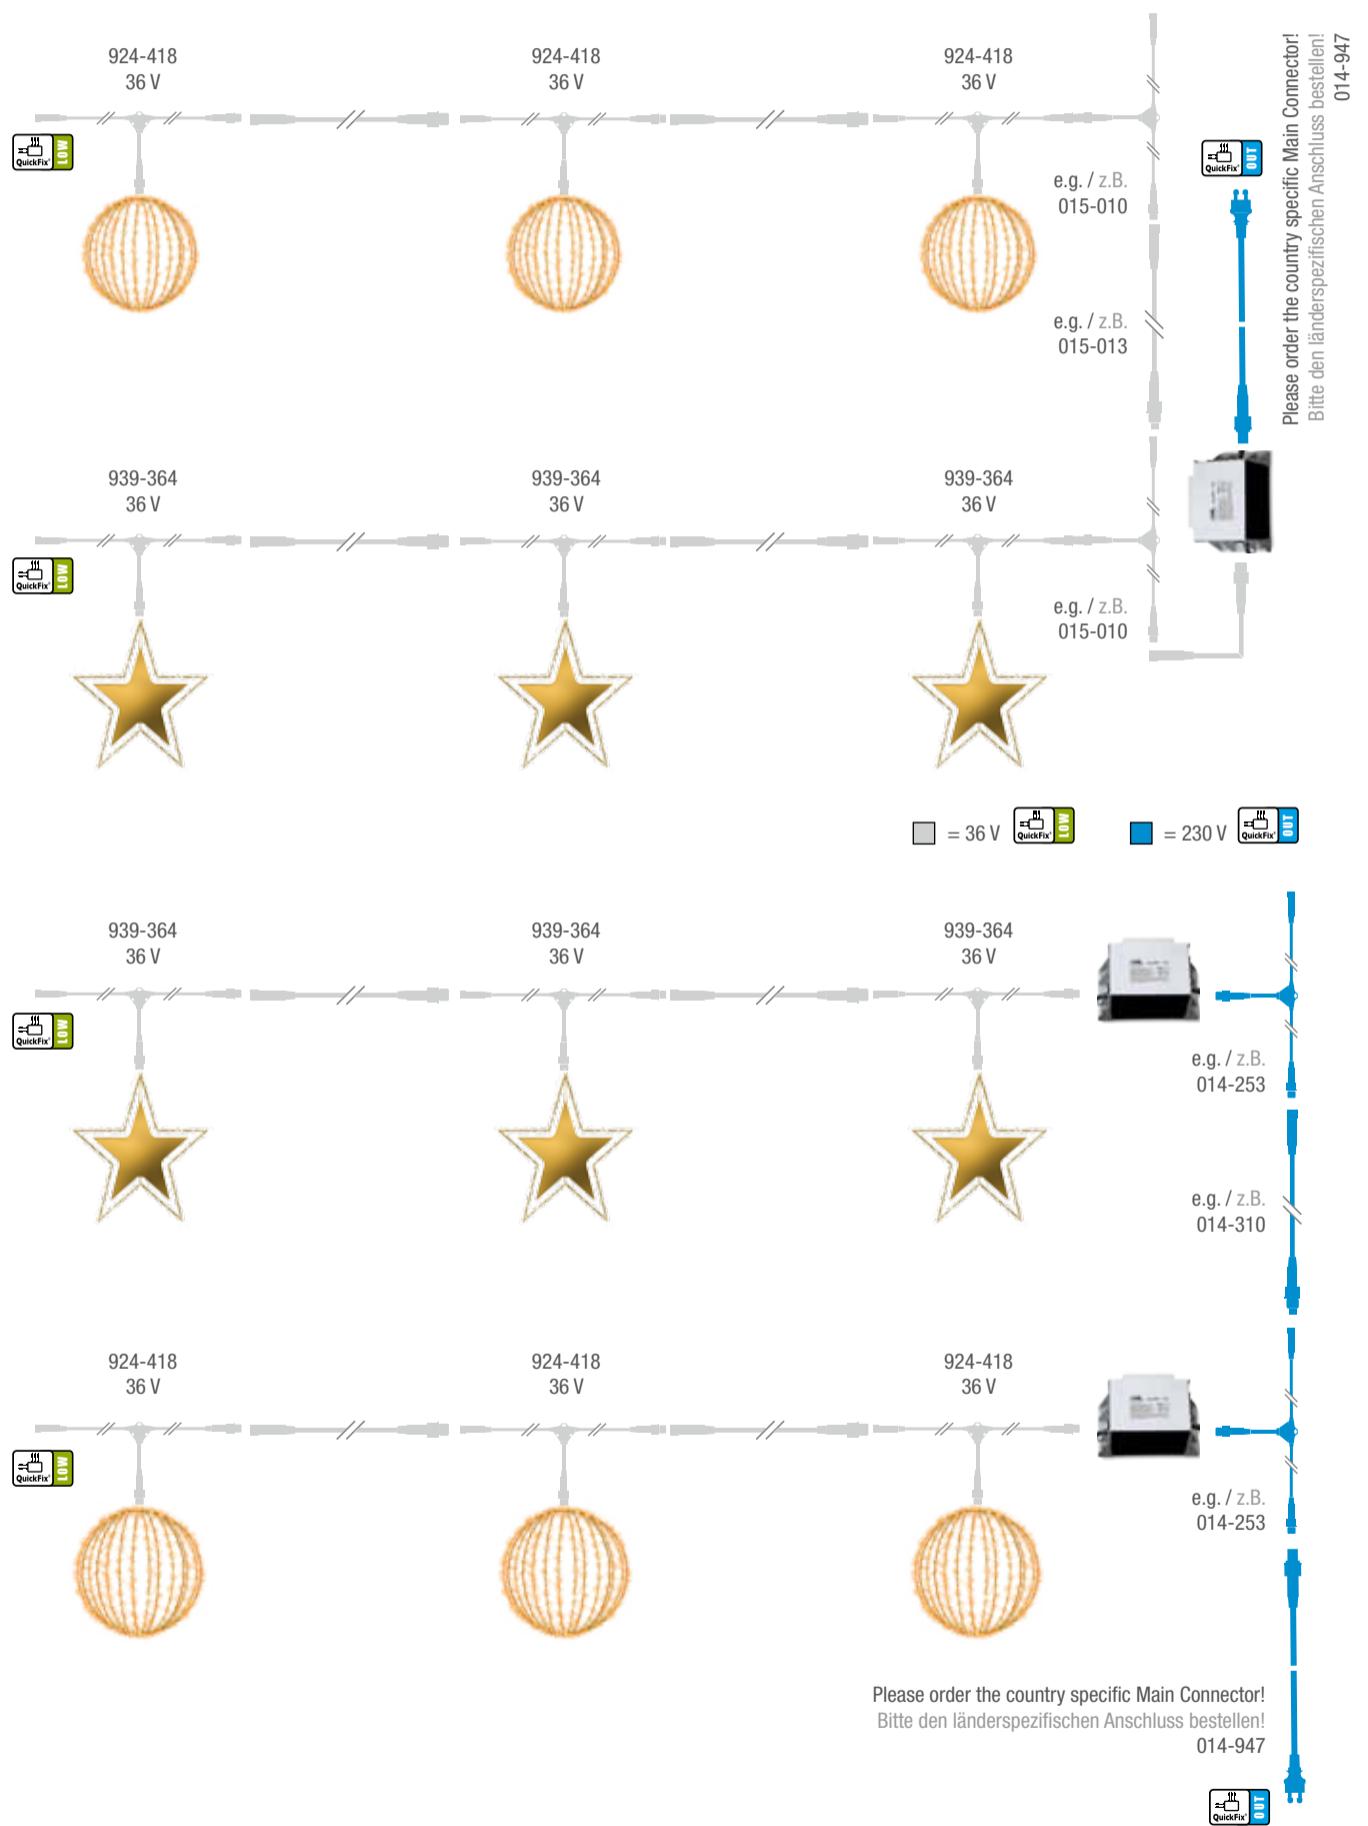

QuickFix® Extension 5

max. load capacity: 200 W (92C)
max. Belastbarkeit: 200 W (92C)
